

Keep on Truckin' New Fork Trucks Arrive at Red Gold

You don't have to walk too far in any of our manufacturing or warehouse areas before you see a fork truck at work. On any given day, these work-horses can be seen moving finished products to the docks, delivering product to the warehouse and moving raw materials and equipment. It is no wonder that the mileage adds up as the years go by.

Red Gold CEO, Brian Reichart recently announced we would be leasing new Caterpillar fork trucks. The new fork trucks will replace some high-mileage members of our fleet, and bring the total number to 90. "This is a very substantial capital investment," said Jason Owens, Procurement Manager.

Geneva received 16 new fork trucks on Friday. On Monday, Elwood and the DC each received 21 and Orestes 15.

It is no wonder drivers couldn't help taking a short break to check-out the trucks as they were unloaded.
